Product description:

Optimum cleansing action for demanding skin

The Royale Essence Cleansing Cream by CMD is an intensive and conditioning cleansing product suitable for demanding skin types. Make-up residues and dirt particles are effectively and gently removed with the help of rhassoul, while the skin is prepped for subsequent care. The cleanser contains precious plant oils, and in combination with organic pomegranate extracts, smooth the skin and stimulates its own regeneration process. The contained shea butter supports the protective barrier of the skin and is thus able to retain moisture. It is recommended to use the Moisturising Fluid or the Regenerating 24h Cream from the same skincare line after cleansing. Fruity scent.
