

SPF30 UV Glow Fluid

Manufacturer: Weleda
Order ID: W5614
Price: 12.95 €

Product description:

Moisture & protection for sunny days

The UV Glow Fluid is a sun protection fluid with high protection. The purely mineral filters offer balanced UVA/UVB protection, while the glow pigments contained in the formula give the skin a radiant glow. The fluid also provides the skin with long-lasting moisture.

Ingredients:

Water (Aqua), Zinc Oxide, Helianthus Annuus (Sunflower) Seed Oil, Coco-Caprylate/Caprate, Titanium Dioxide (nano), Polyglyceryl-6 Stearate, Caprylic/Capric Triglyceride, Pentylene Glycol, Glycerin, Polyhydroxystearic Acid, Undecane, Polyglyceryl-10 Laurate, Moringa Oleifera Seed Oil, Cetearyl Alcohol, Simmondsia Chinensis (Jojoba) Seed Oil, Haematococcus Pluvialis Extract, Citric Acid, Acacia Senegal Gum, Tocopherol, Bisabolol, Lecithin, Polyglyceryl-3 Polyricinoleate, Tridecane, Caprylyl Glycol, Sodium Stearoyl Glutamate, Polyglyceryl-6 Behenate, Xanthan Gum, Isostearic Acid, Stearic Acid, Mica, Alumina, Titanium Dioxide

Tips from Gabi Köberl:

Do not expose the skin to direct sunlight for a prolonged period of time even when a sunscreen is applied to the skin. The midday sun (noon - 4 pm) should be avoided. Prolonged sun exposure may lead to serious health risks.

Always apply a sufficient amount of sun protection before exposing the skin to direct sunlight. Using insufficient sun protection reduces the protection effect drastically.

Repeat the application regularly to maintain the protection factor. This must be done after swimming, towel drying or sweating.

Use a sun protection factor that corresponds to your skin type and skin tone.

Fair skin tones and sensitive skin types should begin by applying a sun protection factor of 50 which allows the skin to adapt to the sun's rays.

Babies and small children must be protected from direct sunlight. Appropriate protective clothing (hats, sunglasses, protective clothing, etc.) is strongly recommended.
