Tips from Gabi Köberl:

1. Shake the bottle until the solid phase separates from the bottom of the bottle.
2. Spray on the hair and let it act.
3. to ruffle out after drying, done.

The spray distance determines the intensity:

5 cm - approach

10 cm distance - lengths

15 cm distance - refresh

For volume:

The hairstyle is flat and needs fresh volume quickly? To ruffle while spraying!

1-2 sprayers are usually sufficient here.

For volume, to ruffle at the roots directly on the head like a 5 finger scalp massage.
