Product description:

Dreamlike silky complexion overnight

Midnight Miracle Sleeping Cream restores facial skin in need of recovery and prepares it for the next day. Throughout the night, its deep-acting care complex enhances the nocturnal renewal process. With its unique combination of innovative active ingredients, nourishing oils and plant butters, this rich night cream provides the skin with intensive, restorative care. Deeply refreshed and toned, it awakens silky smooth and supple – good morning!

Intensively refreshed skin with Blue Tansy and Beta-Glucan

Midnight Miracle Night Cream replenishes the skin's moisture reserves and provides strong, plant-based barrier protection for natural regeneration. Highly effective beta-glucan stimulates cell renewal and activates new collagen production, while at the same time deeply hydrating the skin in a soothing way. Hyaluron also helps to effectively retain the skin's own moisture.

Rich in valuable antioxidants, blue tansy strengthens the skin. It soothingly provides powerful protection by counteracting signs of premature ageing, irritation and impurities. At the same time, the sapphire-blue, antibacterial oil gently complements sleep with its relaxing, herbaceous Mediterranean fragrance. Exquisite vanilla extract is true balm for skin and senses. Soothed and strengthened through and through, the skin can regenerate intensively.

Revitalising night cream for morning energy

In the evening, high-quality organic fair-trade skincare ingredients are gently applied to the skin and are absorbed immediately, giving it new, sparkling energy overnight.

The finest shea butter protects the skin from drying out and replenishes it with its valuable nourishing ingredients. The skin-friendly Murumuru plant butter helps to strengthen the skin with its omega fatty acids, vitamins and minerals. Precious argan oil envelops it in velvety softness. This is how a truly restful night begins with the Midnight Miracle Sleeping Cream.
